Patent No. US20020131964A1

Fatent No. US20020131964A1

GENERAL INFORMATION:

APPLICANT: CINES, Douglas B

APPLICANT: CINES, Douglas B

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND

TITLE OF INVENTION: TISSUE CONTRACTABILITY

FILE REFERENCE: 9596-331

CURRENT APPLICATION NUMBER: US/09/880,503

CURRENT PILING DATE: 2001-06-13

FRIOR FILING DATE: 2000-06-20

NUMBER OF SEQ ID NOS: 18

SEQ ID NO 4

ENGRY 135

LENGTH: 135

Sequence 2, Application US/09880503

Patent No. US20020131964A1

GENERAL INFORMATION:

APPLICANT: HIGAZI, Abd Al-Roof

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND

TITLE OF INVENTION: TISSUE CONTRACTABILITY

FILE REFERENCE: 9596-331

CURRENT APPLICATION NUMBER: US 60/212,847

FRIOR FILING DATE: 2000-06-20

RACOR APPLICATION NUMBER: US 60/212,847

FRIOR FILING DATE: 2000-06-20

NUMBER OF SEQ ID NOS: 18

SEQ ID NO 2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ó.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         161,

Application US/09969271

Sequence 7. Application US/09969271

Patent No. US20020098179A1

GENERAL INFORMATION:

APPLICANT: Pfizer Inc. (All designated States except GB and EP (GB));

APPLICANT: Ffizer Limited (GB and EP (GB) only);

TITLE OF INVENTION: Pharmaceutical Combinations;

FILE REFERENCE: PGS10951APME

CURRENT APPLICATION NUMBER: US/09/969,271

CURRENT FILING DATE: 2001-10-01

PRIOR FILING DATE: 2001-10-07

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A;Contents: annotation; conformation and disulfide bond assignments by (1)H-NMR
K;Hansen, A.P.; Petros, A.M.; Meadows, R.P.; Netteshelm, D.G.; Mazar, A.P.; Olejniczak, submitted to the Brookhaven Protein Data Bank, January 1994
A;Reference number: A66822; PDB:1URK
A;Contents: annotation; conformation and disulfide bond assignments by (1)H-NMR, residue R;Spraggon, G.S.; Phillips, C.; Nowak, U.K.; Ponting, C.P.; Saunders, D.; Dobson, C.M.; Submitted to the Brookhaven Protein Data Bank, July 1995
A;Reference number: A6608; PDB:1UM
A;Contents: annotation; X-ray crystallography, 2.5 angstroms, residues 168-175;179-426
C;Comment: This enzyme is found in urine in a high molecular mass form, consisting of A;Generics:
